

# Revolutionize Project Management and Testing with our Next-Gen AI Platform

## Essential Project Management Capabilities - by Gartner

- **Data-Driven Decisions:** for smarter project planning and execution.
- Boost Project Efficiency through **Automation**
- Manage projects using **Agile & Hybrid Management** methods.
- **User-friendly**, intuitive interfaces and **Secure**, robust data security.
- **Strategic Alignment** with business goals to maximize ROI.

## While many tools are available, most fail to meet these needs

- **Limited Flexibility** and rigid workflows that fail to adapt diverse project needs.
- **Limited Scope** to Handle Niche Projects Effectively.
- Struggles with **Scalability Constraints** in Managing large-scale projects.
- **Process Misalignment** with Organizational Processes.
- Limited Advanced Capabilities or **Underutilized Features**.

Drawing from our industry experience, we've identified that most project management tools fall short of meeting critical needs. In response, we've developed a new platform that addresses these gaps, delivering efficient, scalable, and user-friendly solutions tailored to complex and specialized project requirements

## Our Solution

PIEDAP, a Gen AI-powered SaaS platform delivers comprehensive and unified project management solutions for a wide range of industries. It seamlessly combines project management with scope, milestones, requirements, risk management, assessment, and quality engineering.

### PROJECT 360

Enhances project management across various industries by improving visibility and streamlining operations.

### RC 360

Offers a strong framework for managing risk and ensuring compliance, adaptable to all industries.

### ASSESSMET 360

Transforms project management across industries using AI-powered assessments for improved requirement collection and scoping.

### QE 360

Provides a comprehensive set of testing tools to improve software quality in various industries.

## Industries Supported

- Technology
- Healthcare
- Manufacturing
- Retail
- Finance
- Construction
- Education
- Energy
- Media
- Government
- Services

## Gen AI Powered Key Features

- **EPICs Creation:** AI generates project EPICs and Requirements.
- **Scope Discovery:** AI crafts requirement gathering forms.
- **Feedback Consolidation:** AI analyzes stakeholder feedback.
- **EPICs Updates:** AI updates EPICs with stakeholder feedback.
- **User Stories/Modules:** AI creates modules and user stories.
- **Feature Development:** AI designs features specification.
- **Impact Analysis:** AI generates traceability for Scope changes.
- **Sprints/Deliveries:** AI plans and schedules sprints.
- **Task Creation:** AI formulates and generate tasks.

### Functional Requirements Focused:

Ideal for Projects focused on functional requirements (Epics/User Stories).

### Specification Centric:

Perfect for product design, architecture, and tech-driven projects.

### Unified Development:

Best fit for projects that combine both technical and functional components.

## Our Unique Project Handling Methods

### Administration Focused:

Tailored for managing organizational changes and administrative projects with precision and efficiency.

### Research & Development:

Engineered for innovation and R&D projects, with a focus on user-centered design and rapid prototyping.

### Standards-driven:

Compliance projects that adhere to specific standards or guidelines

### Task-Oriented (Services):

Projects focused on maintenance, support, and service tasks.

## PIEDAP Usecases

### PIEDAP Solutions

- Hybrid Management
- Task Automation
- Real-Time Analytics
- Predictive Decisions
- Compliance and Security
- Communication Enhancement
- Production Monitoring
- Supply Chain Adaptability
- Strategic Alignment
- Efficient Audits
- User-Friendly Tools
- Sales and Inventory Insights
- Remote Team Management
- Streamlined Communication
- Insightful Project Management
- Regulation Adherence
- Software Development Lifecycle Management
- Marketing Campaign Planning and Execution
- Construction Project Coordination
- ERP, CRM Implementation, Rollout
- IT Infrastructure Deployment
- Research and Development (R&D) Projects
- Event Planning and Management
- Corporate Compliance and Regulatory Reporting
- Human Resources Onboarding Process
- Corporate Restructuring Initiatives
- Healthcare Facility Management
- Retail Store Openings and Expansions
- Educational Program Development
- Financial Audit Processes
- Manufacturing Process Reengineering
- Supply Chain Optimization Projects
